

WELCOME to the official site of the
21st Biennial Conference on Chemical Education (BCCE) 2010

The 21st BCCE will be held August 1-5, 2010 at the University of North Texas in Denton. The 21st BCCE, like its predecessors, is designed to provide you opportunities to interact with chemistry instructors at all levels in formal and informal settings. The Conference will offer plenary lectures, symposia, workshops, chemical demonstrations, poster sessions, exhibits and tours.

General Information About the BCCE

The BCCE is a national meeting sponsored by the Division of Chemical Education (DivCHED) of the American Chemical Society (ACS) and is designed for those who teach chemistry at all levels: secondary school science teachers, undergraduate and graduate students, and post-secondary chemistry faculty. The Conference provides anyone teaching chemistry opportunities for interacting with like-minded colleagues in both formal and informal settings. Teachers who are about to launch their careers, those who are new to teaching chemistry, and those who have teaching experience will find this conference to be an excellent source of materials, techniques, and chemistry content. The BCCE helps teachers make connections with others equally committed to teaching chemistry. Education professionals are invited to visit the 21st BCCE Website at <http://bcce2010.org> and submit a proposal for a symposium or workshop starting March 2, 2009. Abstract submission for an oral or poster presentation will begin October 2009. You do not have to be a member of the ACS or DivCHED to attend or present at the BCCE.

To receive the most current information and deadline notifications relating to the Conference, please join the 21st BCCE listserv by adding your name to our list at: <http://chemed.tamu.edu/bcce2010>.

Sincerely,

The 21st BCCE 2010 Planning Committee
